Dear Readers in the US

Playing your cards right in Los Angeles

Silvia just called to invite us to participate in the annual jass event of the “Swiss in the South Bay” Club. This got me thinking on how much playing cards is a Swiss tradition. Mind you, not just any card game, it’s “Jassen!” If you are not Swiss, it’s pronounced “Yassan” and it’s serious business. During the year, you can hone your skills weekly at Ueli Hueglin Restaurant, every Wednesday. Address: Swiss Chef Restaurant at San Remo, 13727 Victory Blvd., Valley Glen, CA 91401 – (818) 904 1500.

If you live in another part of Los Angeles, try the Chalet Edelweiss Restaurant where the Bachofners organize something most Thursdays. Just call to make sure. Address: Chalet Edelweiss, 8740 Sepulveda Blvd., Westminister, CA 90045, (310) 645 8740.

If once a month is your thing, then your best bet is of course the Swiss Park. Card sharks meet the second Wednesday of every month at 7:30 pm. Just let Max Bachmann (mebachmann@sbcglobal.net) know that you are interested. He will send you an invitation/reminder.

And then there is the jass competition arranged by the Young Matterhorn Swiss Club every year, usually in May. Some 40 players take part, arriving a little before noon to register. Lilo gives everybody a number and sends them to one of the tables, set with a jass-carpet, a deck of cards and forms to fill in with the results. This is a very official competition. Four players, two against two, play eight rounds, calculate their results and hand them in to Lilo. Then the numbers are redistributed and the next round players are participated for the first time. I still had played cards at home. But it was no idea of strategies, special rules when the results where announced have ruined many players’ hopes! champion. He took my jass education some serious training sessions, just for Spain where we regularly played being transferred to Argentina, there is a “jass-interruption,” because we didn’t know anybody who played. What saved my husband’s life was the fact that a jass-CD was sold in Switzerland. So he started playing at the computer. Sometimes he got so mad at his computer-partner, that I was afraid he would throw the laptop out the window! Köbi, computer and CD survived. In 1998 we came back to the Los Angeles region and immediately started playing. One year, Köbi was again jass champion and then later even I won a championship. His teaching had paid off.

I think it was about 1987 when I par-worked at the Swiss Consulate and more of a version for children. I had etc., etc., and was second to last at the end of the afternoon. I must Then I got married to a former jass tion in his hands and we started the two of us at home. Then we left with three different couples. After a “jass-interruption,” because we didn’t know anybody who played. What saved my husband’s life was the fact that a jass-CD was sold in Switzerland. So he started playing at the computer. Sometimes he got so mad at his computer-partner, that I was afraid he would throw the laptop out the window! Köbi, computer and CD survived. In 1998 we came back to the Los Angeles region and immediately started playing. One year, Köbi was again jass champion and then later even I won a championship. His teaching had paid off. When I called my mother in Switzerland to boast about my win, she said: “Oh, you must have had such good cards!”

“No, I said, I played my cards right!”

New England Founding of ETH Zurich Alumni Association

Have you ever wondered why Swiss universities don’t stay in touch with their former students? Most competitive colleges in the USA stay connected to their alumni, and attending reunions is an important tradition for many. Now ETH-Zurich alumni have a similar opportunity to stay connected – to each other and to their alma mater.

Of the approximately 600 former ETH-Zurich students in the USA, about half are in New England. October 22, 2010 marked the founding of the ETH Zurich Alumni NE Council welcoming both recent and seasoned graduates for a reception at swissnex Boston and inviting them to join the association. This is the mission statement that was presented by Council president Dean Glettig.

• Offering a dynamic local alumni network with strong ties to ETH Zurich and other alumni chapters worldwide
• Sharing a passion for Science & Technology and facilitating the exchange of knowledge, experience and ideas
• Serving as ambassadors for ETH Zurich and building productive links between Switzerland and the New England Region of the United States of America
• Inspiring personal and professional development; creating our future!

ETH Zurich President Ralph Eichler addressed the over 100 guests and toasted this festive moment with the wine of ETH-Zurich alumnus Hans Joerg Wyss who owns the Halter Ranch vineyard in Paso Robles CA. The guests also learned that ETH-Zurich now teaches its master classes in English. To learn more about the ETH-Zurich Alumni NEC or to join, log in to www.newengland.alumni.ethz.ch.

American alumni cultivation is often closely linked with fundraising. Even with such a modest yearly tuition at the ETH-Zurich of around CHF 1000, fundraising is not the prime motive for creating ETH-Zurich Alumni Council. But many graduates now living in the USA realize what an incredible gift they received with this almost free education and want to give something back to their school. The ETH-Zurich Foundation welcomes funds to push strategic initiatives forward: Medical Engineering, Sustainable Construction, and Electrical Energy, for example. One such initiative is to support the best talent through an excellence scholarship. Find out more at www.ethz-foundation.ch.

While watching the rowers who participated in the world’s largest regatta on the Charles River, ETH-Zurich NEC Board members and ETH-Zurich representatives strolled the parklands and exchanged ideas for collaborations and events. From left to right: Jacqueline Gasser-Beck, Swiss Consulate/Swissnex; Donald Tillmann, ETH-Zurich Foundation; Prof. Viola Vogel, ETH-Zurich; Renata von Tscharnier, NEC, Charles River Conservancy; Daniel Schaufelberger, Vice President NEC; ETH-Zurich President Prof. Ralph Eichler; Dean Glettig, President NEC; Peter Brunner, CEO ETH-Zurich Alumni Association; other board members of ETH-Zurich Alumni New England Chapter (NEC) not shown: Simone Airoldi, Francesco Albertini, Patrick Anquetil, and Rafael Garcia.

Nicholas Dungan, a political and economic commentator and transatlantic expert. So it came to pass that on the 23rd of September 2010, over 100 people gathered at NYU’s Gallatin School of Individualized Study to celebrate the book launch of “Gallatin: America’s Swiss Founding Father.” Distinguished guests spoke of Gallatin, his place in history and relevance to the present.

Dr. John Sexton, President of New York University, identified with Gallatin’s cosmopolitan personality. He stated that the goal of NYU is to create a university both in the city and of the city. This was the multicultural and organic approach that Albert Gallatin, a co-founder of NYU in the 1830s, sought to realize during the first few years of the university’s existence.

Ambassador Christoph Bubb, Consul General of Switzerland in New York, pinpointed Gallatin’s education in Geneva as the foundation of all his later accomplishments. Gallatin was not the average immigrant who became “Americanized,” but actively shaped the newly born nation. Throughout Albert Gallatin’s entire life, the core values of his Geneva upbringing such as decisive logic and discipline were evident.

Finally, author Nicholas Dungan thanked everyone at the Swiss Confederation and New York University Press for the support in writing this biography. He expressed astonishment that someone of Gallatin’s stature could be bypassed in history. He hoped that, with the book and the Gallatin250 project, Albert Gallatin would receive his deserved recognition. The author ended by quoting the first sentence of the introduction: “Albert Gallatin, born in Geneva and raised in the Swiss and French-speaking tradition, came to America in his youth and, in a lifetime of public service to his adopted country, contributed to the welfare and independence of the United States as fully as any other statesman of his age.”

California
In search of open minds

Severin Ott is President of the United Swiss Societies of Northern California. He left Switzerland in 1969 and found the open-mindedness he was looking for in the San Francisco Bay Area.

Janis Joplin? Severin Ott had never heard of her when some friends took him to a concert in 1969. Ott was 19 years old, hardly spoke any English and had just emigrated to Canada from Weggis by Lake Lucerne. It took him a while to realize what this concert was all about: Woodstock.

This was the open spirit that he had been looking for when he left Switzerland. He didn’t find it in Canada, where, at that time bars still had separate lounges for men and women. Given this and the cold weather not to his taste, he moved to California in 1971, following a family tradition. Some of his ancestors had left Switzerland in the early 19th century, others in the 1940s, and three of his six brothers and sisters had already settled in California. With his apprenticeship in the construction industry in Switzerland, he easily found work in the booming building business around the San Francisco Bay Area and made his way to be a civil engineer. Finally, he found the open-mindedness he had been looking for. “I was never a hippie, I needed a secure job. But I was looking for a society where things don’t have to be done the same way as they always have been,” he says. California proved to be this innovative environment. Severin Ott, now 61, experienced many changes since the 1970s: the end of race riots and the Vietnam war, the boom in Silicon Valley, the constant immigration of people from all over the world. “It was the end of the era when Swiss immigrants could easily get a long-term visa,” he recalls of the 1970s. Nowadays, most Swiss have a work visa for only three or four years or come as exchange students.

Ott doesn’t regret having left Switzerland and enjoys living in California. But he still feels more Swiss than American, and still shows up at appointments a few minutes early. “I could probably live in Switzerland today. The Swiss have become more open-minded,” he smiles. He visits Switzerland about every five years, particularly for class reunions.

When his two children were born, his desire to celebrate his Swiss heritage grew stronger. He joined the Peninsula Swiss Club and is now President of the United Swiss Societies of Northern California, an umbrella organization of eight Swiss clubs. “It would be a shame if these organizations ceased to exist,” he says. But Ott feels that they must become more family-friendly. Some years ago, children were not even allowed to join the annual Fondue event. Severin Ott can be reached at: Severin_Ott@hotmail.com.

Langrütistrasse 30
CH- 8840 Einsiedeln, Switzerland
or e-mailed to
benno.chaeli@bluewin.ch

Our celebration started with a cocktail hour and music by the Windjammer Euro Band lead by Thomas Groeber. Thomas welcomed us all in the Ball Room with his fine Alphorn tune. Our Master of Ceremony, Jack Bronkovic, greeted sixty-nine members, friends and guests. The President of the SBS Philadelphia, Dolf Herger, welcomed special guests: Honorary Consul of Switzerland in Philadelphia, Mr. Franz Portmann; President of the Swiss Benevolent Society of New York, Mr. Beat Reinhardt, and President of the New Helvetic Society, Chapter Pennsylvania, Mrs. Veronique Sturzenegger. The SBS President also introduced the Directors of the Board and turned the microphone over to Dr. Frank E. Muggler who presented the Invocation for this special event and wished all attendees a pleasant dinner.

We all enjoyed excellent food and continued to listen to Swiss tunes, which encouraged some couples to take the floor for a dance. The drummers and dancers of the Kulu Mele African-American Dance Ensemble from Philadelphia, lead by Dorothy Wilkie, performed dances from their native country. After a memorable one half hour show we all enjoyed dessert and the SBS President took the floor again to thank all advertisers, supporters and volunteers for helping us to make this event happen.

The band continued to play familiar tunes and I was very happy to see so many couples enjoying their dancing. The 150th Anniversary Celebration came to a close with a Thank-You to all members, friends and guests and a wish for a safe ride home.

Volunteer work at a transitional shelter for survivors of domestic violence

Dr. Irène Gabriel-Thomas, daughter of Walter Gabriel, Ennetbürgen, and Anna Barbara Holenstein, Stein am Rhein, was born and raised in Zürich, where she attended the Kantonsschule Küsnacht, graduated in 1988 with a Maturität Diploma and began to study History at the University of Zürich. After just a few semesters, Irène realized she needed to spend her life interacting with people rather than books, and enrolled in the newly founded Schule für Naturheilkunde in Zürich. This is Irène’s story:

On a trip vacationing in Bali with my daughter Mara, I met Professor John Thomas from the University of Southern California (USC) and his daughter Celeste. That walk on the beach at sunset was telling, and my daughter and I soon joined John and Celeste in Los Angeles. We have been happily married for over twelve years.

I was introduced to Chiropractic while working at Dr. Cheryl Revkin’s Office in Silver Lake as the massage therapist. Although I was accepted to USC’s Occupational Therapy School, I was so intrigued by Dr. Revkin’s work and her role in the community, that I chose to attend Cleveland Chiropractic College in Los Angeles. After graduating with degrees in Doctor of Chiropractic and Bachelor of Science, I went on to study Chiropractic Biophysics with Dr. Meredith Littlefield, and Zindler Technique with Dr. Dale Ellwein, both masters in their fields with decades of experience in practicing and teaching.

The four years of Chiropractic College, which is similar to medical school, form the scientific foundation, and the holistic view I have nurtured since Naturopath School fostered my approach to healing. When Marilynn Fong, a massage client who has long since become a friend, mentioned her involvement with a shelter for abuse victims, I asked if I could treat the families. It has been a source of experience and enrichment ever since.

I have been offering chiropractic care to the women and children at the shelter for over a year on a weekly basis. Upon arriving, I am greeted by the children eagerly waiting their turn while I set up my table and unpack the files. Kids profit greatly from chiropractic care, and I feel fortunate to be able to adjust them regularly. After the kids, I care for the mothers. Regular care helps the body achieve better health, an important factor in the recovery from years of high stress, emotional and physical injury and insult. Body and mind regain strength and resilience. Chiropractic adjustments directly influence the nervous system, which in turn controls every function of the body. Although the families are in a safe place, there is still the challenge of adapting to completely different lives: a new environment, new circumstances, new rules, and being a single parent. My function is to provide relief from aches and pains, listen to and discuss any health concerns, and educate about healthy life style choices. Training in language and job skills, counseling, expressive art workshops, and my health care all aim at the empowerment of the women and their children to live self-determined.

IRÈNE GABRIEL-THOMAS, DC engelinla@mac.com

Last September 16, in recognition of her volunteer work, Dr. Irène Gabriel-Thomas was the happy recipient of the following awards: APWC, California State Senator Carol Liu, California State Assembly Member Mike Eng, and Los Angeles County Assessor Robert Quinn.

The Asian Pacific Women Center (APWC) is dedicated to providing a safe haven and support services for women and children who are survivors of domestic violence. They provide an environment that is sensitive to the cultural and language needs of Asian and Pacific Islander who are domestic violence survivors as well as their families. They help as they acquire the necessary skills and personal strength for self-sufficiency and violence free lives. The shelter is open to families from any cultural background. More about the Center: www.apwcla.org
The Swiss, well known for their dual secondary education system incorporating apprenticeship, shared their educational and public-private partnership models with participants. Caroline Faivet highlighted the Swiss Group’s model of global training through its Nicolas G. Hayek Watchmaking School, located in Florida. Given the high demand for these skills, Ms. Faivet described this unique opportunity available for people one example of the Swiss model of apprenticeship implemented globally.

Appointed Ambassador Sager strongly emphasized the importance of creating the right opportunities at an early age. Apprenticeship programs in Switzerland have proven successful in ensuring professional opportunities for young people and a steady supply of skilled workers for the Swiss manufacturing industry. In addition, with limited natural resources, the Swiss have been encouraged to develop innovative green technology solutions in energy and building manufacturing. Appointed Ambassador Sager said, “we know the added value of well paying green collar jobs is that they serve to ease both the employment crisis and the economic crisis, Swiss and American manufacturing industry leaders issued a collective call to action at the 4th Annual Manufacturing Summit on Green Collar Jobs and Apprenticeship, on November 9, 2010 in Washington, D.C.

Leaders from government, business, and manufacturing organizations working to ensure a solution to the need for more skilled workers in the U.S. addressed the Summit. Among the 21 speakers at the full-day Summit were: Senator Al Franken (D-Minnesota); Senator Amy Klobuchar (D-Minnesota); Assistant Secretary of Labor Jane Oates; Caroline Faivet, President of The Swatch Group (US); Blake Moret, VP of Rockwell Automation; Hans Ulrich Bigler, President of SGV the Swiss Trade Association of SMEs; Phaedra Ellis-Lamkins, President of Green For All; Louis Soares, Director at The Center for American Progress; and Manuel Sager, the newly appointed Ambassador of Switzerland to the United States.

Sessions and panel discussions emphasized solutions to the skilled labor shortage including the importance of coordinated public-private partnerships to build capacity and ensure economic growth. It was noted by several that the current opportunity is positively impacted by the demand for more green collar manufacturing jobs.

“The United States needs a coherent and coordinated national manufacturing strategy - a Manufacturing Mandate -- if we are to grow and prosper as a nation. ‘Smartforce’ development has to be a priority component of this strategy, because our people are the catalysts of innovation,” said Doug Woods, President of The Association for Manufacturing Technology (AMT).

He continued, “We must work together with our government and our schools to ensure that American workers are equipped with the skills necessary to take on the world and come out on top!”

Key priorities in the Manufacturing Mandate include:

- incentives for innovation and R&D for new products;
- more capital;
- global competitiveness;
- minimize structural cost burdens; and,
- enhanced public private partnerships between government, businesses and educational institutions.

The Swiss, well known for their dual secondary education system incorporating apprenticeship, shared their educational and public-private partnership models with participants. Caroline Faivet highlighted the Swiss Group’s model of global training through its Nicolas G. Hayek Watchmaking School, located in Florida. Given the high demand for these skills, Ms. Faivet described this unique opportunity available for people one example of the Swiss model of apprenticeship implemented globally.

Appointed Ambassador Sager strongly emphasized the importance of creating the right opportunities at an early age. Apprenticeship programs in Switzerland have proven successful in ensuring professional opportunities for young people and a steady supply of skilled workers for the Swiss manufacturing industry. In addition, with limited natural resources, the Swiss have been encouraged to develop innovative green technology solutions in energy and building manufacturing. Appointed Ambassador Sager said, “we know the added value of well paying green collar jobs is that they serve to ease both the employment crisis and the
fiscal concerns of employers and workers alike.” Fiscal, unemployment and energy concerns were shared by both Senator Klobuchar and Senator Franken. “Despite Minnesota experiencing the highest unemployment levels in a generation, there are manufacturing jobs in our state that remain unfilled,” said Sen. Franken “While Minnesota has some exceptional programs in place to train a 21st century labor force, Congress needs to ensure that our investments in education and job training keep up with our country’s workforce needs to rejuvenate our economy for generations to come.” Senator Klobuchar, speaking later in the morning added, “The strength of our nation is tied to the strength of our energy economy. With the ingenuity of American farmers and manufacturers, we have the ability to be the global leader in energy.” Assistant Secretary Oates offered the keynote speech to the audience of 150 manufacturing leaders. “I am pleased to join in this conversation on the shared futures of advanced manufacturing, green jobs and Registered Apprenticeship,” said Oates. “Our Registered Apprenticeship program has a record of success when it comes to creating nationally recognized credentials. Continuing to develop and refine connections between Registered Apprenticeship and green careers is a key aspect of delivering training that gets more workers into good jobs in promising industries.” In addition, Assistant Secretary Oates mentioned the upcoming Solicitation Grant Application (SGA) of $500 million of available funds to support grant recipients in developing new public-private partnerships between educational institutions and local businesses, to build capacity in expanding sectors such as manufacturing and green technology. Funding, innovation, incubation, and improved partnerships were key messages that participants took back to their respective businesses in the United States and Switzerland.
